PREFACE

IN PUBLISHING this booklet, we have in mind a booklet for the benefit of those who wish to beautify the garden by the addition of the fast growing popular water pool.

Landscape Architects, Gardeners, owners of Country Estates, Nurserymen and many others have long sought just such information as is contained in this little booklet.

Our aim is to furnish this information for the benefit of the lovers of the beautiful waterlilies and the ever-charming Goldfish.

In presenting this booklet to you, we believe we can say that we are the only people who are producers of all that is needed for the water pool. With our large area of ponds, owning and operating over one hundred and fifty acres, actually under water, and devoted to the culture of Goldfish and Lilies and other water plants, we believe we are the best equipped to serve you. Both our plants and fish are shipped direct from our ponds to you. We want to strongly impress upon you the fact that we are not distributors but actually producers operating our own ponds or lakes, varying in size from the garden pool to ten acres in one pond or lake, all totaling over one hundred and fifty acres, from which we ship millions of Goldfish and thousands of Waterlilies every year.

Three Springs Fisheries *and* Aquatic Gardens

Gardens and Fisheries: Adamstown, Maryland

General Instructions to Customers

OUR GUARANTEE. We have a tremendous plant, and a very large investment, which is a valuable asset. We guarantee to our customers complete satisfaction. We give superior quality, prompt and efficient shipments and answer promptly any and all correspondence. We give freely any and all information. You are assured of honest dealing, high quality, efficient service and reasonable prices and above all **YOU MUST BE SATISFIED.**

ORDER EARLY. This is most important. Remember our guarantee. All we ask is your co-operation. We suggest that you order at once and leave to us the time of making shipment. All orders will be shipped, location considered, in rotation. Those who order early are assured of better service and certain of our having on hand just what they want. While we have, no doubt, the largest acreage in the world devoted to the culture of water lilies and goldfish, yet we believe you can appreciate the fact that early ordering will help everyone.

SHIPMENTS. All plants, roots, etc., are carefully packed and leave our station in perfect condition. All fish are in perfect condition. We cannot be responsible for good arrival of either as the trouble may be due to improper handling. All shipments are made by express collect. Should any shipments arrive in bad condition, take a bad order receipt and we will help collect as we have your interest at heart. Should you wish shipment by mail, send postage to cover, ten per cent (10%), **not** ten cents (10c).

WHEN TO PLANT AND WHAT TO ORDER. We will be glad to recommend such varieties as will give best results. Many prefer to have us make selections. Send us a sketch of your pond or pool, and tell us the surroundings and we will be glad to serve you, free.

SUBSTITUTION. At times, especially on late orders, we may be unable to furnish a certain variety specified. In all such cases we substitute similar (never lower priced) plants or fish unless otherwise instructed.

PRICES AND TERMS. All prices are net cash and effective January 1st, 1931. No orders are entered unless accompanied with funds to cover. You will find us rated in the Commercial Agencies, so that you need not hesitate to send in your remittance. Ask your bank to look us up. **WE DO NOT SHIP C. O. D.**

No flower is easier to grow than the Water Lily. After planting it requires no cultivation—no rake, no hoe, only a little water is added, just enough to take care of evaporation. You can have flowers every day—no work, no care, no worry, and yet every day fresh flowers to greet you each morning.

YOU MUST BE PLEASED

*The largest acreage in the world devoted to Waterlilies and Goldfish
See our Water Gardens. They are truly wonderful.*

The Fascination of the Culture of Waterlilies and Goldfish

There is nothing more beautiful nor fascinating than the lily pool or the lily tub. No part of your garden will be more frequented nor have such favorable comment—and yet it is within reach of practically everyone.

EXPERIENCE. We want to assure you in the very start that there is no flower or plant so easy to grow as the lily. We go on record as saying that no experience whatever is necessary in order to be successful. Since they cost so little there is no reason why you should not have a garden distinctive; a little different from your neighbor; a little more attractive.

REQUIREMENTS. Oh, so easy—Sunshine, still water, and soil. Your pool or tub should be so located that it will not be shaded. Your plants if planted in a stream or brook should be planted in comparatively quiet water, not swift running water, and you should have good rich soil to get best results. **COULD ANYTHING BE SIMPLER OR EASIER?** For your pool you may have running water or not as you like. (See under Planting, Depth of Water, and Soil.)

TIME OF PLANTING. Waterlilies may be planted as soon as they begin to show growth in the Spring generally about April first up to last of August. Probably the best time is in April and May.

COLOR. Water lilies can now be obtained in practically all colors—white, dark and light pink, red, yellow, etc.

DURATION OF BLOOM. Lillies start blooming in the early Spring and continue blooming until frost. The flowers open every morning (day bloomers) and close every afternoon. There are also night bloomers. You will be assured of several flowers from each root every day throughout the entire season. What can be more beautiful than a pool or a few tubs of these different colored lilies in bloom every day, and to think every morning they open to greet you.

Pool or Tub

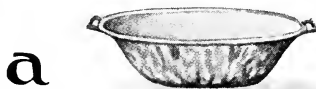

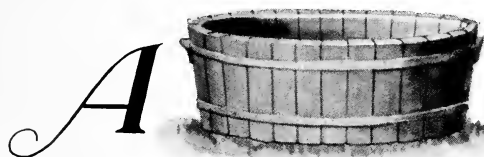

To those who have the room we recommend the pool. To those who do not have the room for a pool and want the beauties of the lilies we recommend the "Tub" or half-barrel.

POOL AND HOW TO BUILD IT. To those who want a pool, we strongly urge a cement pool. Better use tubs than have an unsightly mud-hole. Water lilies should have from nine inches to a foot of water over the soil or crown of the plant. You should have about one foot of soil so that your pool should carry water from one foot nine inches ($1\frac{3}{4}$ feet) to 2 feet in depth. Water should be about 3 inches from the top, so that the walls will be 2 feet to 2 feet 3 inches. A foot deeper will do no harm. The top of the finished wall may be just below the surface of the surrounding ground or it may extend out of the ground for a foot or more. Many pools are now built practically on top of the ground. One may thus sit on the side walls and admire both the fish and lilies. This is becoming more and more popular as it saves excavation, can be more easily removed, and above all it affords a more comfortable manner of viewing the contents. The pool can also be more readily drained. The walls should be 6 inches, finished on both sides where above ground. The bottom should be from 6 to 9 inches. We prefer 8 inches at one end sloped to six or seven inches at the other so as to give drainage. A drainage pipe should be provided at the low point. We also suggest reinforcing the bottom, also the sides where in the ground. We suggest the use of ordinary wire farm fencing. Use one part cement, two of sand and three of crushed $\frac{3}{4}$ -inch stone. (See sketch, Page 5).

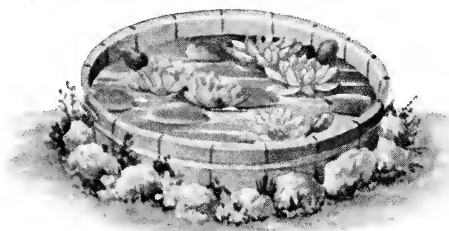

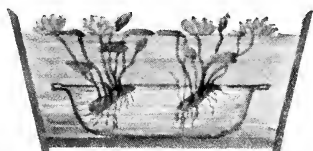

SIZE. A pool 12 by 20 feet will accommodate twelve plants. This is a convenient and popular size. (See sketch, page 5.)

PLANTING, DEPTH OF WATER, AND SOIL. Either of two methods may be followed. There are many failures in planting in too deep water. If you can regulate the water flow, we suggest that you cover the crown of the root about three inches. As the plant grows, add additional water from time to time. In this way your plants will grow much faster than by planting in deep water. Cover the cement with from nine inches to a foot of rich soil and plant the lilies in the soil just leaving the tip of the plant protrude. The other method which we greatly prefer is to plant the roots in boxes and sink the boxes in the pool. This is easier to plant and easier to remove. We suggest about one part cow manure to three parts soil. The best soil is a heavy fibrous loam clay, mixed with well-rooted cow manure, or bone meal. Do not use sand, leaf mould or peat; fresh manure must be avoided, its fermentation may sour the water or burn the roots. Cover the box with about two inches of sand. This will prevent the fish from disturbing the roots and also prevent discoloring the water.

Tub Suggestions

some  , some earth,
manure and water – and combined
we get

See also Page 12

INSECTS, ENEMIES OR PESTS. The most common insect is the Aphis. This is always worse when the weather is hot and dry with little or no rainfall. The best and cheapest remedy is the use of the hose or spray pump. A liberal spraying will knock the insects into the water where the fish will make short work of them. Slug Shot, tobacco dust or weak solution of Bordeaux mixture or other insecticides may be used but are unsightly. The muskrat is a very bad enemy and frequently will eat many roots where they have free access to large dirt ponds, as well as cutting the banks and letting out the water.

CARE FOR PLANTS IN WINTER. Drain the water from the pool. Either remove the plants—boxes and all—to your cellar or cover them where they are with sufficient straw or leaves to prevent freezing.

TUB AND HOW TO MAKE IT. For this we recommend a kerosene or linseed oil barrel; any kind of a vinegar or cider barrel. A barrel OF ABOUT 50 GALLONS should be sawed in half making two tubs. Place one, not over two roots, in an old discarded wash pan which has been filled with soil and manure, one part good rich cow manure to three parts soil. Over this place an inch or so of sand, if available. Place this into the half barrel and fill within an inch or two of the top. Only add enough water from time to time to take care of evaporation. In winter upset the barrel, remove the pan to your cellar or other place to prevent freezing. If you prefer you can place the soil directly into the tub or half barrel and plant in the soil.

WHERE TO PUT IT. About the only care that must be exercised in placing a tub is to put it where the sun will shine on it. If you live in a crowded or congested section you may place it on your front or back porch. It may be suspended or not. It requires a very small space, only about 2 ½ feet square. No yard is too small for it. On either or both sides of the entrance to your home, it will be a source of endless admiration. When you bear in mind that it is not a monthly but a daily bloomer, you can see why it is becoming so popular. New flowers will open every day to greet you, and lilies will bloom from early spring until killed by frost.

FISH WITH FLOWERS. Every one knows how fascinating are goldfish. To see these beautiful, graceful creatures swimming about amongst the flowers and leaves of the lilies is surely a most beautiful and interesting sight. Not only will it be an endless source of interest to your children but to every member of the family. Only those who have experienced the thrill can appreciate the great joys in store for those who order one, two, or three tubs—the ever increasing way of enjoying the pleasures of the water lily.

Bear in mind we are not distributors, but the world's largest producers of Hardy Waterlilies and Goldfish

POOL OF DR. JOHN H. KINTER, CHAMBERSBURG, PENNSYLVANIA

GOLDFISH. Every pool or tub of Waterlilies should have a supply of Goldfish. Some will want fancy and some the common goldfish. Not only will you want Goldfish for their own beauty but they will purify the water and eliminate any chance of mosquito as they thrive on mosquito larvæ.

HOW LONG AFTER PLANTING UNTIL BLOOM? This will depend upon your location and the weather. Lilies bloom in from five to six weeks after planting. They continue in bloom until frost.

NATURAL PONDS OR STREAMS. No better way to beautify a pond or stream than by planting Waterlilies. Simply plant them in the soil at the bottom of the pond or stream. Be careful to see that the root is firmly placed in the soil. If necessary lay a stone over the root until it attaches itself to the soil. Do not plant in water less than $\frac{1}{2}$ foot or more than 2 feet deep, and never plant in a current. In this condition the roots need never be taken up as they will not freeze.

OTHER WATER PLANTS. We have quite an assortment or variety of water plants from the Sacred Water Lily of the Nile, the Lotus, to the water poppy, etc.

BETHLEHEM, PA., September 9, 1930

THREE SPRINGS FISHERIES,

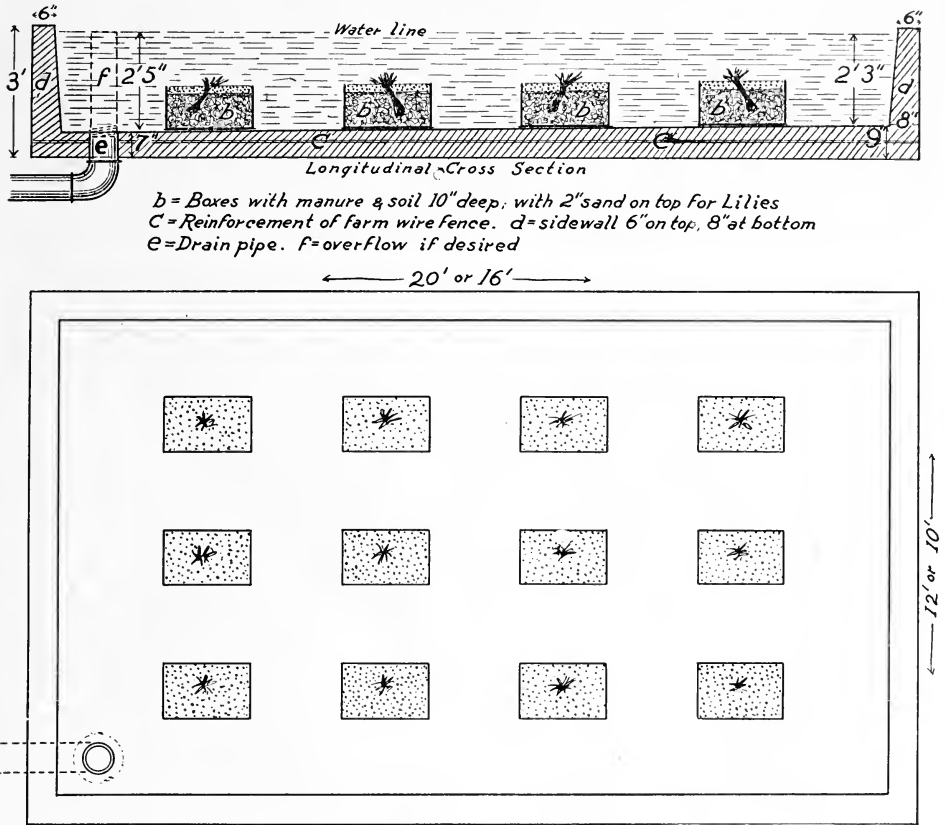

Frederick, Maryland.

Dear Sirs:—

I wish to state that I received the two goldfish, and the plants in good condition last week. Thanking you for your prompt attention to this matter. I am,

Very truly yours,
MARK M. MATZ.

We produce both Goldfish and Waterlilies and Aquatic Plants. Buy your requirements from producers and be satisfied

How to Make a Pool

The above is for a plain pool 12 feet by 20 feet (or 10 by 16) with two feet of water, with one foot over crown of flower. Boxes filled within 2 inches of top with rich cow manure and soil. Top 2 inches of sand. A very natural effect may be had, by laying on the top of the wall, river or cobble stones, and having these level with the outside soil.

Pools may be constructed, with straight or curved lines. We give only a few suggestions and the details of construction. If you have a good solid clay bottom you can lay the cement on the clay, if not we suggest that you put in 6 inches of cinders, beneath the cement bottom. Be sure to have the cinders well packed. The construction can be made by any cement worker. The overflow and drainage pipe should be the same. A short piece of pipe with thread on the end can be screwed into the drain pipe.

The ideal water pool is about two feet deep. The side walls should be about six inches in thickness, tapering to eight inches at the bottom. The bottom of the pool need not be more than six inches.

Good results can be obtained from a mixture of one part Portland cement, two parts sharp sand, and three parts half-inch gravel (if gravel is not available crushed stone may be used) mixed with water and poured over the bottom and up the sides. The rough places of the concrete may be smoothed down by applying a thin coat of cement with a trowel or paint brush. It is important to keep newly poured concrete moist for several days by sprinkling frequently several times over a period of ten days, before any fish or plants are placed in it, as the alkali may injure the fish and plants. (Your local cement dealer will gladly give you a pamphlet on "Cement Construction.")

It is also advisable to reinforce the construction by using hogwire netting usually three-eighths or one-fourth inches. This material is very easy to bend up the sides of the pool, being sure each strip of netting overlaps the previous strip.

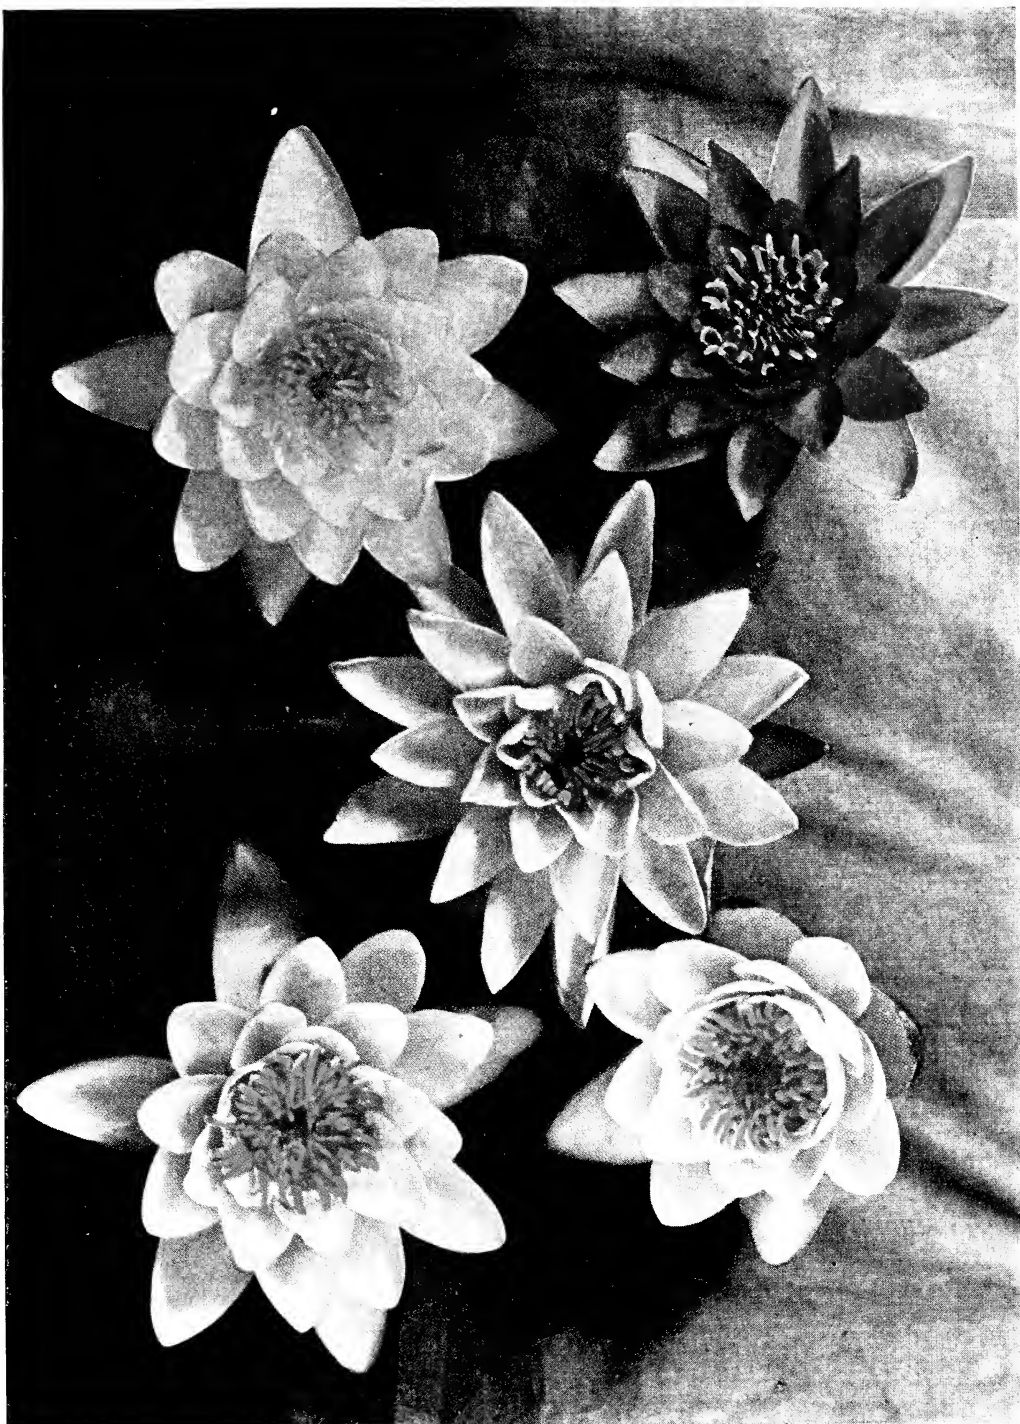

Your pool should be carefully washed out before planting. Should a green scum appear, this will be due to vegetable growth and will disappear in a short time. Do not change water and above all do not add chemicals, as this will injure both the plants and fish. If absolutely necessary flush the pool.

OUR PRIZE BASKET COLLECTION

CHROMATELLA

ROSE AREY

ESCARBOUCLE

HELEN FOWLER

MARLIAC ROSEA

This new "1931 COLLECTION" (one of each) of five superb Lilies.
A collection sure to please for \$12.50.

Hardy Waterlilies

There is indeed a large class of many colors of Hardy Waterlilies. These plants grow equally well whether in pool or in tub or in the soil. A foot of water over the crown, together with sunshine is all that is necessary. We have the purest Whites, various shades of Pinks, Dark Red to Bright Red, Yellow, and the changing colors.

If you wish the fragrant, sweet smelling Lily, you should order one of the Odorata. The Hardy Lilies offered are all Day Bloomers. They open in the early morning and close every afternoon. Each bloom should last several days and each plant should have several blooms daily. **We recommend those in heavy type.**

WHITE

ALBA The well known European Lily. Flowers float on the water, and measure four to six inches. Blooms freely. A quick strong grower. **Price, \$1.00 each.**

Marliac Albida White petals with yellow stamen, and very fragrant. A continuous bloomer. Sepals are tinted with pink. Leaves are deep green above, and red beneath. **Price, \$1.50 each.**

ODORATA This is probably the most common of all Lilies. It is the native pond lily common to our country. It is pure white with yellow stamen. It is very fragrant. **Price, 25c each; \$2.50 dozen.**

Odorata Gigantea Very similar to the former. Very large, pure white and very fragrant. Flowers are often 6 inches across. A free bloomer. We have no hesitation in recommending it. **Price, 75c each; \$7.50 dozen.**

ODORATA MINOR This lily is especially valuable for tub culture. Flowers are small and

very fragrant. From 2 to 3 inches in diameter. Suitable for planting at edge of ponds. **Price, 75c each.**

Gladstone This is a pure white Lily of unusual size, and strong growth. Flowers often 6 to 8 inches across. It is one of the largest of the white lilies, and requires plenty of room. Purest white, cup shaped with golden stamen. **Price, \$2.00 each.**

PYGMÆA This is the smallest lily in cultivation. We hesitate to recommend it because of its small size. Flowers are pure white with yellow stamen. A free bloomer. Good for tub culture. **Price, \$1.50 each.**

Tuberosa Richardsonii Flowers are pure white, very double and of large size bloom, frequently 6 to 8 inches across. It is cup shaped and a selection you will want to add to your collection. It is a shy bloomer. **Price, \$1.50 each.**

LOOSE A very fine white hardy lily. Flowers freely and continuously. This flower is very fragrant. **Price, \$2.00 each.**

PINK

ROSE AREY We consider this the most desirable of any of the fragrant lilies. No collection is complete without this flower. It has a brilliant pink color. The petals are pointed and incurved. It has golden yellow stamen. One of the very best bloomers, producing very large flowers often 7 or 8 inches in diameter. **It is by far the finest of the pinks.** See color illustration, page 10. **Price, \$2.50 each.**

Helen Fowler This is another deep pink with lighter center with flowers borne well above the water. It is especially adapted to tub culture. Of all lilies this would be our choice for tub culture. It is very fragrant and a free bloomer. Flowers not so large but sure to please. What it lacks in size is more than offset by its continuous blossoms and sweetness. See illustration, page 7 and inside back cover page. **Price, \$1.25 each.**

Marliac Carnea Large soft flesh pink, deeper toward the center. Very free flowering, of a strong vigorous growth with large purplish red leaves changing to deep green. A free bloomer and one which exhales a sweet vanilla fragrance. See illustration, inside back cover. **Price, \$1.50 each.**

MARLIAC ROSEA This is similar to Carnea except that it is a deep pink. Large flowers of deep rose pink. Flowers 4 to 5 inches. See illustration, page 7. **Price, \$2.50 each.**

EUGENIA DE LAND An odorata type. Flowers are extra large with long, and lanceolate petals. A very beautiful color of deep rose pink of iridescent hue. Yellow stamen. Flowers float on the water. A very vigorous and free flowering variety. A very desirable plant. It was awarded the silver medal by the Newport Horticultural Society. **Price, \$1.50 each.**

Pink Opal An attractive deep pink, a medium size flower. It is especially adapted for cut flowers. See illustration, inside back cover page. **Price, \$2.00 each.**

W. B. SHAW A very fragrant rose-colored lily. A free bloomer; one of the most attractive of the pinks. **Price, \$1.50 each.**

TUBEROSA ROSEA This is a strong vigorous grower with flowers well above the water. A very delicate shade of pink. Flowers are from 4 to 5 inches. **Price, \$1.00 each.**

WM. DOOGUE One of the finest of the delicate pinks. It is a soft shell pink, a beautiful cup shaped bloom. A very free flowering plant. **Price, \$3.00 each.**

YELLOW

Sunrise One of the first lilies to open in the morning. A free bloomer of very large size. It has long narrow petals. In color it is a clear sulphur yellow. It starts blooming early in spring, and continues until late fall. Does well in any depth water and stands crowding. **Price, \$5.00 each.**

Marliac Chromatella Flowers yellow, 4 to 6 inches. Leaves green mottled with brown. A free bloomer. We consider this the finest of

the Marliacs. This plant should be divided every few years. A charming canary yellow flower with bright yellow stamen. See illustration inside back cover page. **Price, \$2.00 each.**

PYGMÆA HELVOLA A very small yellow flower. **Price, 75c each.**

ODORATA SULPHURA GRANDIFLORA MEXICANA. Bright yellow. Leaves are small. Not hardy north of Baltimore. A free bloomer. **Price, \$2.50 each.**

RED

Attraction Where the pool is large enough we have no hesitation in giving this lily the first rank among the reds. It is a recent French introduction. On opening it is a garnet red, with almost white sepals and stamen of rich mahogany tipped with yellow. It is not only the largest lily in cultivation, often eight to ten inches across, but is one of the most beautiful. No pool of any size is complete without it. **Price, \$6.00 each.**

Gloriosa A deep carmine rose color becoming deep red with age. A continuous bloomer, often reaching 5 to 6 inches in diameter. It is an ideal red lily for either pool or tub culture. **Price, \$5.00 each.**

James Brydon This is a very fine hardy lily. Very free to bloom and a rapid grower. Flowers measure from five to six inches across. Broad massive petals, concave and incurving giving the flower

a cup shape. It is a rich rose crimson. It is well adapted to either tub or pool culture. An early bloomer and you can count on it being in bloom every day. See illustration inside back cover page. **Price, \$3.00 each.**

Escarboucle This is the most brilliant of all of the reds. It is a bright intense red, a vermillion with garnet stamen. A strong grower and a free bloomer. It is unquestionably one of the best. To those who have never had this variety it will prove a rare treat. See illustration, inside back cover. **Price, \$5.00 each.**

WM. FALCONER The darkest colored of any lily. Flowers from 6 to 7 inches across of a bright garnet ruby color with yellow stamen. It is a shy bloomer. **Price, \$5.00 each.**

CONQUEROR An immense flower. A robust grower of French origin. The flowers are a cherry red. Stamens are an orange yellow. **Price, \$5.00 each.**

CHANGEABLE COLORS

Paul Hariot A free bloomer; light yellow delicately shaded copper red. Flowers are large and cup shaped. A free bloomer. **Price, \$3.00 each.**

COMANCHE Large flowers of rich apricot color on opening, changing to a dark coppery-orange with flowing red as the flower ages. Leaves are an attractive olive green, flaked with brown. **Price, \$3.50 each.**

AURORA These flowers are creamy yellow on the first day. By the third day, they have changed to a dark red. This gives a variety of color daily. **Price, \$2.00 each.**

INDIANA A changeable orange pink. On opening it is creamy yellow and shades through many colors becoming on the fifth day a dark crimson. **Price, \$3.00 each.**

A Water Garden in a Wooden Tub or Tubs

Because you live in a city, or on rented property, or for any reason do not wish to spend the money for a concrete pool, or build a pond, is no reason why you should not have the pleasure of the Waterlily and Goldfish. The demand for Tub Gardens is increasing all the time. Many of the best Waterlilies are peculiarly adapted to Tub Culture such as the Helen Fowler, Pink; the Odorata, White; the Chromatella, Yellow; the Paul Hariot, Changeable; all very pretty.

These tubs may be placed upon a block of wood above ground or sunk into the ground to any depth. They may be bought singly or in groups of two or three.

You may place into the tub an old dish pan filled with soil. In winter remove the pan to your cellar and upset the Tub. Place the Goldfish in your aquarium in the house. Next season get the old pan, refill the tub and put out the goldfish and you are ready again. Your lily roots should be divided every few years. See also page 3.

We offer the following Tub Collections

We Give A Complete Tub and Garden for \$3.25

Tub Collection "D" \$3.00

For those who have their own tubs or half barrels we offer 2 lilies both colored for **\$3.00**
(No white in this unless requested).

Tub Collection "B" \$6.00

For 2 tubs 4 lilies
Helen Fowler, Pink.
Odorata Gigantea, White.
James Brydon, Red or Rose Arey,
Dark Pink, (our choice).
Marliac Chromatella, Yellow.
With tubs add **\$2.00** for each tub.

Tub Collection "C" \$4.00

1 Lily, pink, white or yellow, your choice.
1 Lotus, pink or yellow. (We suggest pink lily with yellow Lotus).
6 Water Plants, some floating.
This is a fine collection for **\$4.00**
With tub complete **\$6.00**
For 1 pair selected common goldfish
(bucket 50c fish **\$2.00**) add **\$2.50**

Tub Collection "A" \$1.25

For those who have their own tubs or half barrels we offer
2 lilies for **\$1.25**
Helen Fowler, Pink.
Odorata, White.
If wanted with tub add **\$2.00**

Tub Collection "E" \$5.00

We have a very limited supply of especially fine pot-grown Paul Hariots. Those blossomed last summer and will make especially fine tub gardens. There can be nothing prettier than this variety of changeable colors in tubs. We offer them as long as they last **with four water plants**. These lilies will come to you with the pot soil thereby giving you early bloom. This variety is one of the longest and most prolific bloomers. An especial bargain at **\$5.00**.

You may have a Pink Lotus instead of Water plants with this beautiful Paul Hariot for **\$6.00**.

This makes a real variegated colored Tub Garden.

EXTRA TUBS

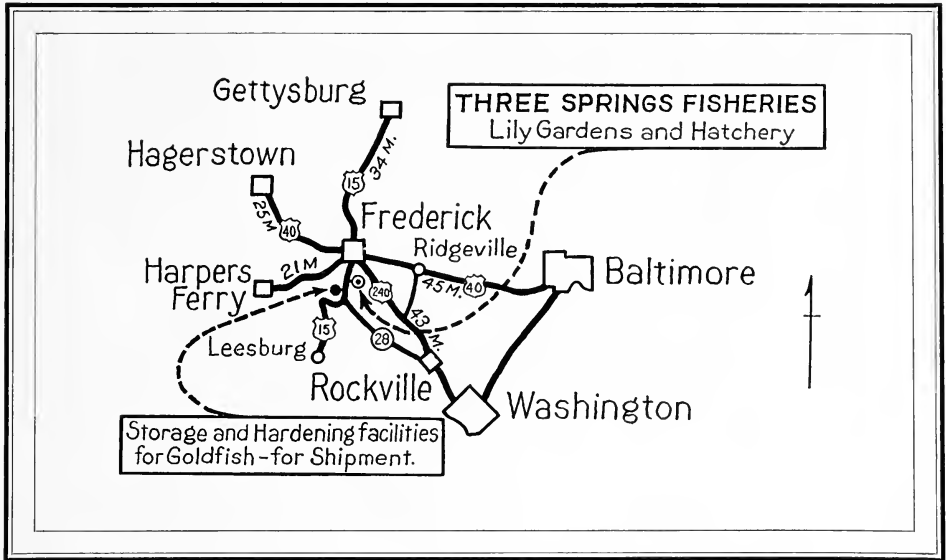

We furnish tubs 2 feet in diameter and 1 foot deep for **\$2.50 each**. They are made of white cedar and will last a long time. They may be used in pools as soil containers for your lilies and plants.

See under Our "SURE TO PLEASE COLLECTIONS" pages 16, 17

Our Small Pool or Tub Collection for \$3.00—It's a dandy

*Why not buy Goldfish and Lilies from the largest—Three Springs Fisheries?
All colored pages are actual photos of our product*

How to Reach Our Properties

FROM WASHINGTON, D. C. Take Massachusetts Avenue to Wisconsin Avenue and straight through Rockville, Bealsville and Dickerson over Monocacy River thence take first macadam road to right (three-quarter mile off main highway) turning off road at small blacksmith shop.

FROM FREDERICK, MARYLAND Drive out South Market Street, thence U. S. Route 15 through Buckeystown, turning left at first macadam road and at small blacksmith shop.

FROM BALTIMORE, MARYLAND Take Frederick road U. S. 40 to Frederick, Maryland. All of our Lily ponds and hatchery are located just east of U. S. Route 15 as shown above. Our Goldfish are kept in storage and hardened and shipped from our property on U. S. Route 15. These places are only about two miles apart. Parties inquiring, who wish to find the lily ponds and hatcheries should ask for the lily ponds; those wishing to see goldfish for sale or ready for shipment should go to the Three Springs Farm.

LANCASTER, PA.,
March 11, 1929.

THREE SPRINGS FISHERIES,
Frederick, Maryland.

Gentlemen:

Enclosed please find order for goldfish. We wish to thank you for the beautiful fantails that you sent us last time.

Thanking you for past favors,

Yours very truly,
R. BATTLES.

Another view of a few
early spring visitors

Don't fail to turn to the Goldfish Collections, Pages 24 and 25. You will want your goldfish with lilies. Nothing so pretty as a beautiful moving object like Goldfish

A Few Waterlilies of Superior Quality and Moderate Price

We have chosen from the many different water lilies what we consider the six best varieties. We have included in this list only those lilies of popular prices. These lilies are well known, popular, and will give an endless amount of beauty and pleasure. They are easy to grow, well established varieties, good bloomers and lilies that have stood the test of time.

Attraction Where the pool is large enough we have no hesitation in giving this lily the first rank among the reds. It is a recent French introduction. On opening it is a garnet red, with almost white sepals and stamen of rich mahogany tipped with yellow. It is not only the largest lily in cultivation, often eight to ten inches across, but is one of the most beautiful. No pool of any size is complete without it. **Price, \$6.00 each.**

Marliac Chromatella Flowers yellow, 4 to 6 inches. Leaves green mottled with brown. A free bloomer. We consider this the finest of the Marliacs. This plant should be divided every few years. A charming canary yellow flower with bright yellow stamen. See illustration inside back cover page. **Price, \$2.00 each.**

ROSE AREY We consider this the most desirable of any of the fragrant lilies. No collection is complete without this flower. It has a brilliant pink color. The petals are pointed and incurved. It has golden yellow stamen. One of the very

best bloomers, producing very large flowers often 7 or 8 inches in diameter. **It is by far the finest of the pinks.** See color illustration, page 10. **Price, \$2.50 each.**

EUGENIA DE LAND An odorata type. Flowers are extra large with long, and lanceolate petals. A very beautiful color of deep rose pink of iridescent hue. Yellow stamen. Flowers float on the water. A very vigorous and free flowering variety. A very desirable plant. It was awarded the silver medal by the Newport Horticultural Society. **Price, \$1.50 each.**

Paul Hariot A free bloomer; light yellow delicately shaded copper red. Flowers are large and cup shaped. A free bloomer. **Price, \$3.00 each.**

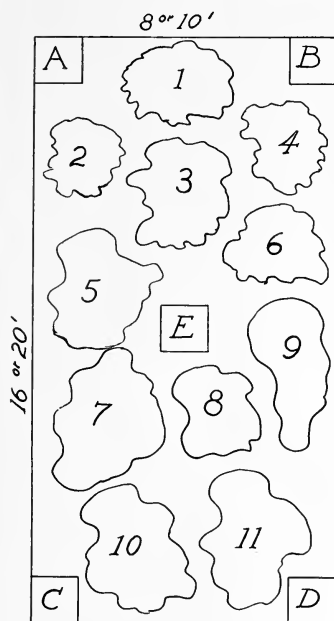

Escarboucle This is the most brilliant of all of the reds. It is a bright intense red, a vermillion with garnet stamen. A strong grower and a free bloomer. It is unquestionably one of the best. To those who have never had this variety it will prove a rare treat. See illustration, inside back cover. **Price, \$5.00 each.**

ATTRACTION (Red)	\$6.00
CHROMATELLA (Yellow)	\$2.00
ROSE AREY (Dark Pink)	\$2.50
EUGENIA DE LAND (Pink)	\$1.50
PAUL HARIOT (Changeable)	\$3.00
ESCARBOUCLE (Red)	\$5.00
	\$20.00

These are unquestionably the two best pinks, the two best reds, the best yellow, and the best changeable.

THE BEST SIX HARDY WATERLILIES, ONE OF EACH

ONE OF EACH, \$17.50

THIS COLLECTION IS NOT LISTED WITH OUR COLLECTIONS
ON PAGES 28 AND 29 SO ORDER FROM HERE AS
"SPECIAL COLLECTION NO. 25"

**CORNERS A, B, C, D**

These four corner (boxes) should include your 15 to 30 plants.

CENTRE E

A splendid place for the Lotus. By all means put this in a box to prevent spreading.

FLOATING PLANTS

Hyacinths, etc. These will float around, among the lilies.

OXYGENATING PLANTS

Plant these with the other aquatic plants and with the lilies. They will provide oxygen for the fish as well as a place for the fish to spawn upon.

GOLDFISH

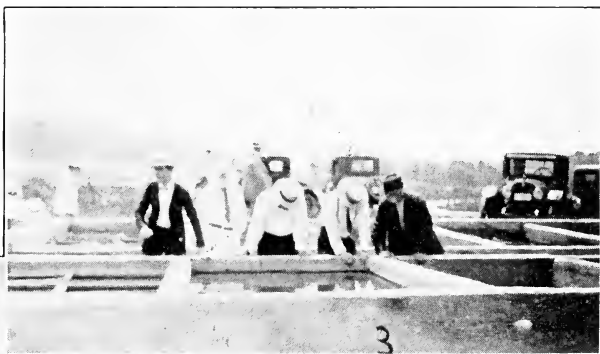

Give them a salt bath and put them in the pond. Do not overfeed them and pollute the water. The lilies will give them protection from the hot sun's rays.

LILIES

Plant them around in your ponds as indicated above. The above illustration shows ten lilies. Some of the more vigorous growers require more space than others.

The above pool might accommodate from 8 to 12 lilies.

One of the owners examining the newly hatched fish. Nests have been removed from this tank. Notice nest in other tank which contain the eggs of the Goldfish. One nest contains from 10 to 20 thousand eggs. We place 10 nests to each tank.

A view of one group of our many hatching tanks. Three batteries of these in which are hatched millions of Goldfish every year. Notice the fish nests in the tanks.

More and more selected brood goldfish of the better class, the finest specimens, are being used every year. Your pool is not complete without the fancy goldfish such as Veiltails, Moors, Calicos, etc. The common goldfish is very beautiful but why not get several pairs (at least one pair) of the best. Above all buy them from first hands, direct from the hatchery. Remember we own and operate the largest plant in the world devoted to Goldfish and Waterlily Culture

Our Plant near the National Old Trail Road, U. S. Route 40. Take U. S. Route 15 from Frederick, Maryland

Our Lily Collections—They Please

In ordering **please use the collection number**. See instructions inside front cover page. Order sheet inside rear cover page. In small pools allow from 8 to 12 square feet of water surface for each lily, thus a pool 4 by 6 feet equals 24 square feet and 8 into 24 would give us 3 waterlilies and other aquatic plants. If you are not sure what to order write us giving us a sketch of your pool, and tell us what colors you prefer. We will do the rest.

We produce both Goldfish and Waterlilies and Aquatic Plants. Buy your requirements from producers and be satisfied

The Water Lotus (**NELUMBIUM**)

This is the sacred flower of the Egyptians. To those having large pools, or natural ponds, this flower cannot help but please. The flowers are borne about a foot above the water. The leaves are very large and beautiful, some standing well above the water, others floating on the water. We consider no garden complete without this most beautiful flower. It is very fragrant and sure to please. We suggest the Lotus be used in pools as a center piece. It may also be planted in a Tub with the Water Lilies. It will bloom well above the water and the lilies will bloom on or near the water.

SPECIOSUM. The true flower of the Egyptians. Large rosy pink. Very free bloomer.....**Price \$2.00 each**

LUTUM. Large rich yellow. This is the American Lotus or Chingquapin. A free bloomer....**Price \$2.00 each**

\$3.00

No Garden can afford to be without the Golden, Yellow Blossoms of the Mystic and Sacred Lotus

Tropical Waterlilies

Illustration courtesy De La Mare Co.

NYMPHÆA

There are two distinct types of tender or tropical waterlilies viz: the Day Bloomers and the Night Bloomers. **No tropical should be planted out until the weather has become settled and warm.** They grow rapidly and last until frost. We only recommend them to those who have already grown the Hardy and we suggest that you treat them as annuals to be purchased each year.

DAY BLOOMERS

Mrs. Edward Whitaker One of the largest of Day Bloomers. Lavender Blue when first open, getting paler as the flower ages. Price, \$3.00 each.

MRS. WOODROW WILSON A dark lavender blue with yellow stamen tipped with lavender. Price, \$3.50 each.

MRS. GEO. H. PRING The best pure white. Flowers 8 to 10 inches. Price, \$3.00 each.

Pennsylvania A blue and a stand-by. Large flowers 10 to 12 inches. Yellow stamen tipped with blue. This

is one of the best Day Bloomers. Price, \$3.00 each.

August Koch Sepals are purplish lilac, with pale wisteria violet petals. Young plants are produced from the surface of the leaves, where the stem and leaf meet. Free bloomer. Flowers 8 to 10 inches. Price, \$3.00 each.

HENRY SHAW A sweet-scented blue with chrome colored stamen. Price, \$3.50 each.

MRS. C. W. WARD A rose pink. A good cut flower. Price, \$2.00 each.

All seven of the above (value \$21.00) for \$17.50. This is a fine Collection of Tender Day Bloomers. COLLECTION No. 1

All Colored Photos of Lilies are Actual Photographs of our own products
See Pages, 6, 7, 10, 11, 14, 15, 18, and also cover pages

Night Bloomers

We give below our list of Night Bloomers. These open as evening falls and remain open all night until about 10 o'clock the following morning. If cloudy they will remain open until about noon. In the fall when weather turns cool they remain open day and night.

LOTUS DENTATA White 8 to 10 inch flower with dark green leaves. A free bloomer. **Price, \$1.50 each.**

BISSET Flowers rose pink, 8 to 10 inches. Leaves bronze green. **Price, \$2.00 each.**

FRANK TRELEASE The darkest of the Night Bloomers. A dark crimson with 8 to 10 inch flower. **Price, \$2.00 each.**

STURTEVANT Large pink suffused with red. Especially desirable in large pools. **Price, \$2.00 each.**

DEVONIENSIS Flowers borne on large stems well above the water, often 8 to 12 inches in diameter. Flowers are bright rosy red color with red stamen. A free bloomer. **Price, \$1.50 each.**

RUBRA ROSEA A deep rosy carmine color. Petals wide at base, tapering to a point. Free bloomer with flowers from 6 to 10 inches across. **Price, \$1.50 each.**

A TYPICAL POOL OF NIGHT BLOOMERS

No Night Bloomers are shipped until after weather has turned warm—about last of May or early June.

COLLECTION No. 2. Any four of the above Night Bloomers the choice of this class, for \$6.00

THREE SPRINGS FISHERIES, Frederick, Maryland.

Gentlemen:—Lotus is very nice, and I thank you very much.

NANNINGTON, W. VA.

Yours truly, CHLORA HUMES.

This Spring when you stock your pool why not put in it some of the best, some of the finest, goldfish obtainable? Buy them direct from a big hatchery making a specialty of goldfish. The great number of young from good selected brood stock will not only afford you and your friends amusement and pleasure, but be instructive to your children. Get them early. Watch them spawn, see the eggs hatch, watch the little fellows grow

THE PINK WATERLILY OF THE FUTURE

The MRS. C. W. THOMAS

A NEW WATER LILY of
exquisite beauty and
fragrance is introduced
to the world of flower
lovers. An exclusive creation.

See inside for description

The Triumph of Floriculture

Unusual Beauty, Delicacy and Charm Characterize this Triumph of Floriculture

ANNOUNCEMENT

WE ANNOUNCE as the aristocrat of the Pink Waterlily Family our new and superb floral creation, the Mrs. C. W. Thomas, patent applied for, U. S. Patent Office, Series No. 482333, under date of September 16th, 1930.

It has ever been the aim of the owners of the Three Springs Fisheries to keep abreast of the times. It is only by new and novel discoveries and inventions that progress is made in any line or business. We, like all who are really interested in their line, are ever seeking for something more beautiful, more delicate, more lovely, more glorious, more fragrant, in a word for something better. All this, and more, we have in the Mrs. C. W. Thomas, which is the acme of waterlily perfection. So much do we think of it that we have named it for and dedicated it to the memory of our Mother. In addition, to protect our interest we have filed application for Patent, which is, we believe, the first and only application for a new lily filed under the new Plant Patent Laws.

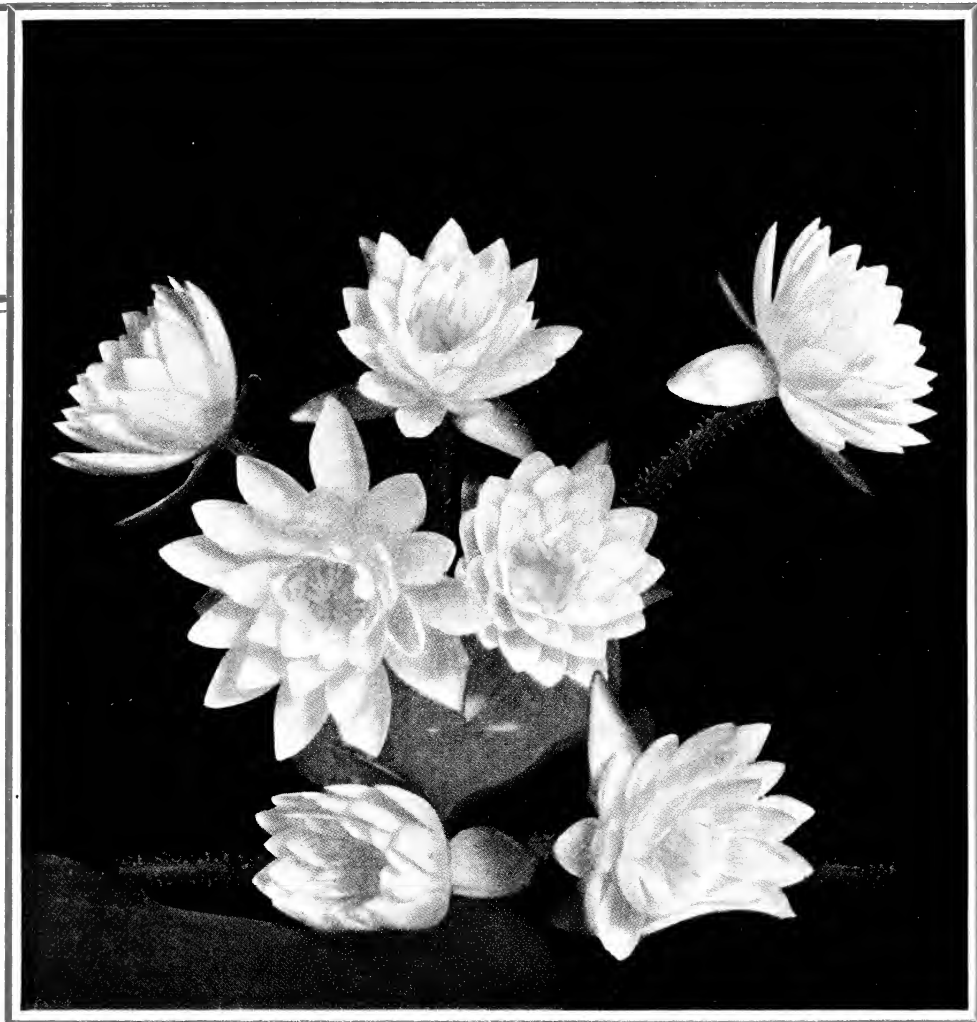

Expert lily growers, botanists, etc., who have seen the Mrs. C. W. Thomas growing in our lily gardens the past summer have pronounced this new creation to be *the most Charming Pink Waterlily* as yet produced. Thousands of visitors to our gardens the past season, were fascinated by the unusual *Beauty, Delicacy and Charm* of this *Triumph of Floriculture*.

Dr. Ball, expert botanist, formerly Principal Agronomist in the U. S. Department of Agriculture, after viewing the flowers and plants in preparing a description of this lily for the application for Patent filed in the U. S. Patent Office, Washington, D. C., says, "*It exhibits certain characteristics of the Odorata and Tuberosa varieties. It is a large flowered, free-blooming, long season, day flowering waterlily with enduring, very fragrant, partly double flowers of a shell pink color, or pale vinaceous pink of the Ridgway Color Chart, with thirty-six petals when the usual Odorata has only twenty-eight petals.*" Thus the Mrs. C. W. Thomas is not only the greatest

The Triumph of Floriculture

THE PINK WATERLILY OF THE FUTURE

AN ACTUAL PHOTOGRAPH COLORED BY ARTIST FROM FLOWERS

achievement of the largest producers of lilies and goldfish in the world, but it is unique in being pronounced by experts as the *Most Charming Pink Waterlily* ever produced.

Where there is a new variety of lily produced, *there is only one root like it in the whole world and from that one root all others must be produced* to supply the demands of the world for the new variety. Add to this, the fact that the Mrs. C. W. Thomas, can be procured through no other source and you can appreciate what demand there will be for this new lily of such extraordinary beauty and charm. We could easily sell our entire output in a wholesale way and at a

The Triumph of Floriculture

price even higher than we are asking, but we prefer to offer our customers this new product. Anticipating the great demand and not wishing to put a prohibitive price upon the same, we have heretofore refrained from offering or selling a single root, and have devoted every effort for the past two years to intensive production, thereby increasing our stock, so that we might have sufficient to meet at least part of the early demand, and at a price which would not be prohibitive.

This announcement and our catalogue will be mailed first to our old customers, thus giving them at least two weeks preference. All orders will be booked in rotation and all orders entered subject to our being able to furnish. There will be no substitution and your order will be filled or money refunded. Order early, and have the newest lily in cultivation. Something entirely different, something experts have declared the Most Charming Pink Waterlily:—One that your friends have never seen, something they must admit is new, something you will be proud to show them.

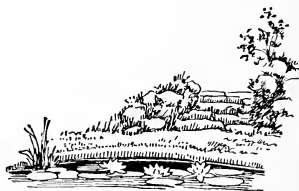

ORDERS BOOKED AND SHIPPED IN ROTATION
POSITIVELY ONLY ONE TO A CUSTOMER
PRICE ONLY \$15.00

IN CONCLUSION: We are proud of the Mrs. C. W. Thomas. We offer it with the utmost confidence. It possesses large size, six to seven inches across, a delicate shell pink, a free bloomer, very fragrant, rather double, truly an aristocrat. We have been modest and conservative with our description and refer you to what an expert like Dr. Ball says as above quoted. We have not attempted a glowing word picture as indulged in by some lily rhapsodists about lilies of even inferior merit which they offer at even higher prices.

THREE SPRINGS FISHERIES
FREDERICK, MARYLAND

ORDER NOW!
So as to be sure
to get one.

Price \$15.00 while they last

GOLDFISH

THE THREE SPRINGS FISHERIES feel justly proud of their plant. The proprietors own and operate more than 1500 acres of land. Situated in Frederick County, the home of the Goldfish industry (as well as the home of Barbara Fritchie, Francis Scott Key, Admiral Schley and others), the Three Springs Fisheries have hundreds of ponds, varying in size from a third of an acre to one of over eleven acres in one pond. This is probably the largest goldfish pond in the world.

The Three Springs Fisheries grow **MILLIONS OF GOLD FISH** annually. With our outlay we have no hesitancy in saying that we are better able to serve you than any one else.

The Three Springs Fisheries have especially constructed pools in addition to their large ponds. We also have many especially constructed cement hatching tanks where goldfish can be viewed any day, in almost any stage of development from the egg up. These eggs are gathered daily and to see them in our hatchery and note the development of the fish is a treat for anyone. Our friends are invited.

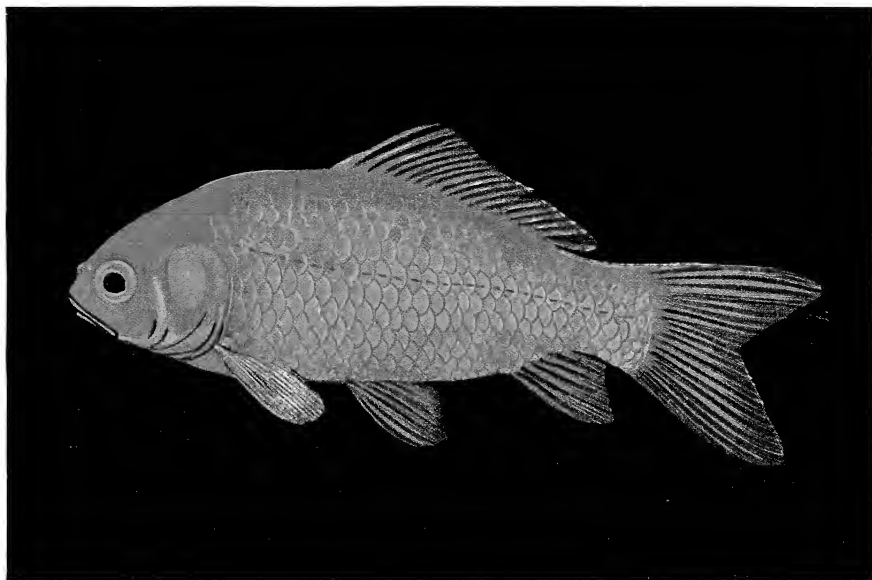

Three Springs Fisheries devote their time and energies to the raising and selling of Goldfish and Water plants.

We ship only Selected or Brood fish (unless otherwise requested) for lily pools or ponds. These fish have been carefully sorted for sex, paired or mated and will not only add distinctive color to the pool, but will spawn the first season. You will be agreeably surprised to see literally hundreds or thousands of little fish turning gold as the season advances. By fall the baby fish should be nearly all turned gold.

The demand for our Selected and paired Brood stock is so great that the supply is always exhausted early in the season. We cannot manufacture them but must grow them. *We urge that you place your order early.*

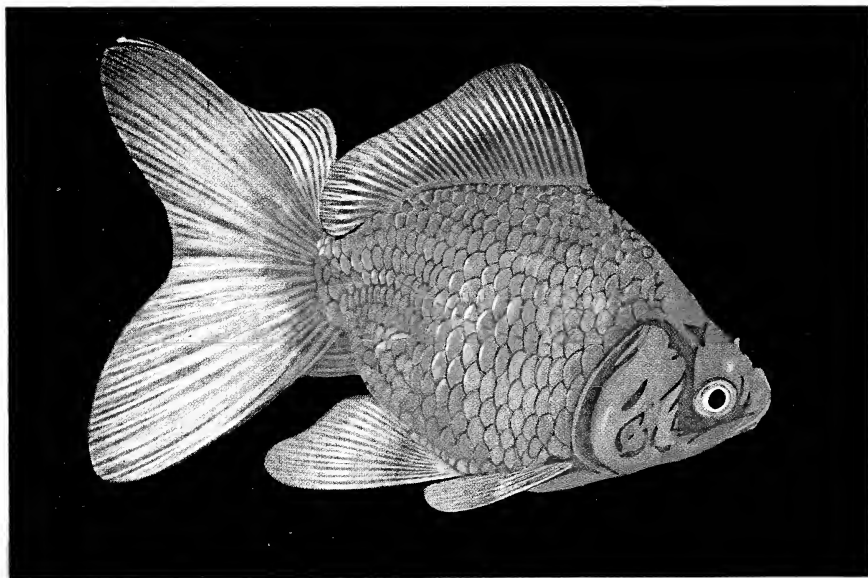

A charge of 50 cents for the shipping can is made on small orders. On large orders we furnish a large shipping can, which is to be returned. The return charges to Adamstown, Maryland, on this large can from any part of the United States is only 20 cents by express. We ask a deposit of \$4.00 per can which of course is refunded on return of can, or upon sending us an express receipt showing return of can to us at Adamstown, Maryland.

We give you pictures and description of the various kinds or varieties of goldfish on the following pages.

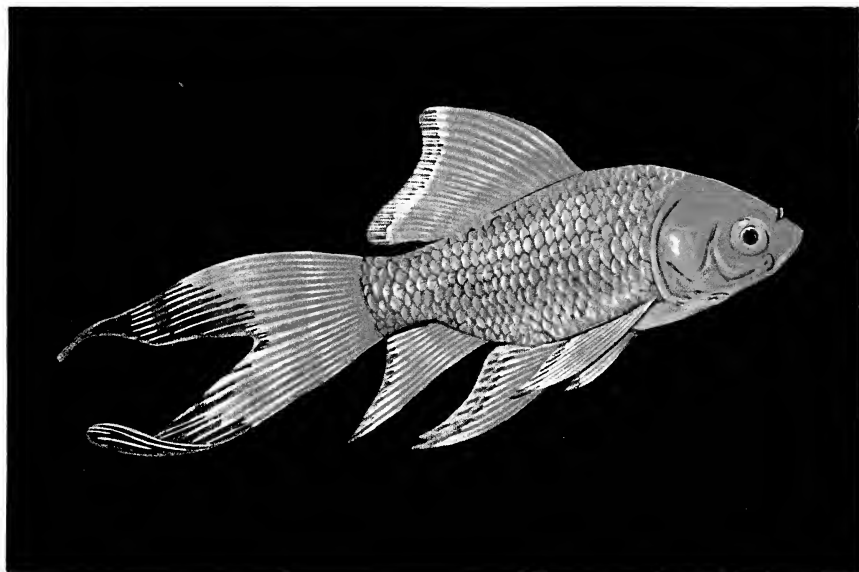

Common Goldfish The Common Goldfish is the parent of all Goldfish. It is not red when hatched. About 50 per cent color the first year. The uncolored are usually sold for bait for fishing. This is the fish most used in aquarium. The largest sizes are used in pools in back yards, and in lakes, in parks, and on Country Estates.

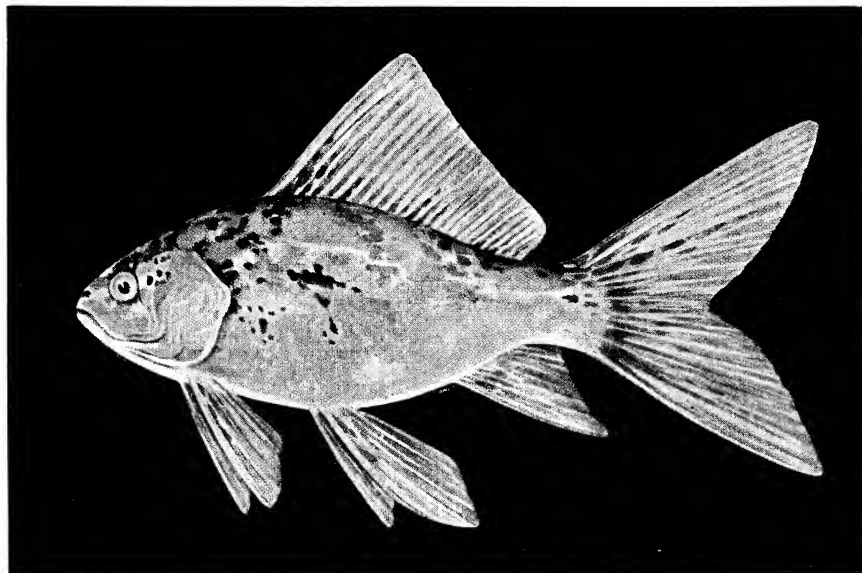

Their life in the aquarium, depending upon the care given is from several months to several years. In pools and lakes they should live from fifteen to twenty years. **Price: Giants, per pair \$5.00, dozen \$25.00; Young Giants \$2.00 to \$2.50 per pair; dozen \$10.00 to \$12.00. See page 24.**

Japanese Fantail Japanese Fantails have always been most highly prized. We pick from our enormous production these selected Fantails for pools, lakes and show places. Your orders placed with us assure you of the best. Especially selected from our millions for body development as well as for tail and fin development. We offer these selected at **\$3.00 to \$10.00 per pair. See price list, page 24.**

Comets These are goldfish with long tails and long fins. They are rapid swimmers and never fail to attract attention as they dart about through the lilies and other water plants. You will never regret trying this variety. They are picked from our large production of many millions especially selected for tail and fin development. We offer these selected and paired. **Price: Large size—for pools \$6.00 per pair; dozen \$30.00. Smaller size—for tubs or small pools, \$1.50 per pair; dozen \$7.50. See page 24.**

Shubunkins A new variety. Often entirely or nearly scaleless. Very beautiful, with patches of red, black and blue on a pearl background. There are no two alike. No goldfish collection complete without this variety. **Price: Large sizes, \$5.00 per pair; Medium size, \$3.00 per pair. See page 24. We never have enough of this variety to fill orders. So order early.**

*Nothing more beautiful, productive too, than Selected Goldfish. They multiply rapidly in pool

Commercial Goldfish Prices

NOT BREEDING BUT SELECTED STOCK

We offer below the same class of fish that we sell to the commercial trade. They are graded commercially by varieties and sizes, the length of the fish from tip to tip indicating the size.

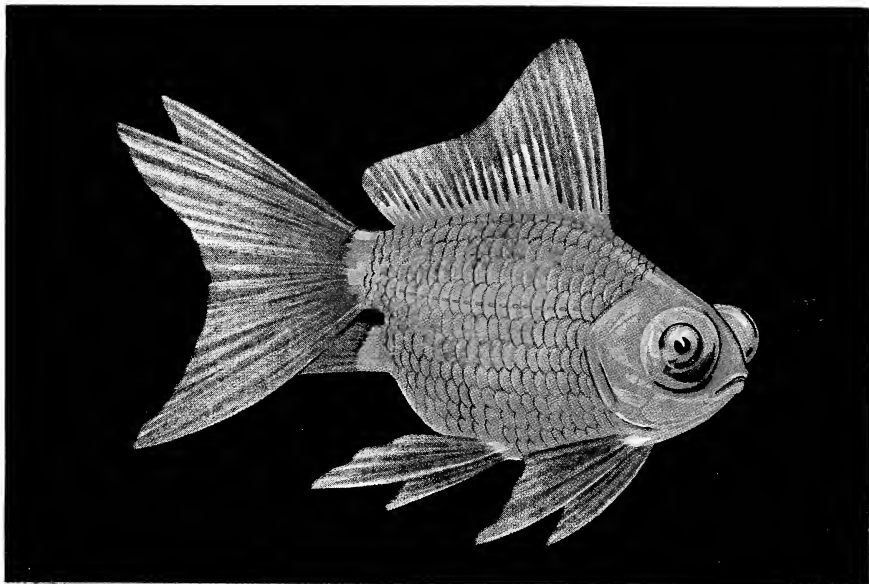

All of our fish show wonderful coloring and vitality. Stock hatched in the Spring is shipped the following fall and winter. We ship fish practically the entire year. The demand for our fish is so great that in the summer we are usually out of many sizes.

All shipments are made from our Hatchery at Adamstown, Maryland, by express, charges collect. On small orders a charge of 50 cents for each can. On large orders shipments in our cans which are to be returned charges 20 cents prepaid. WE CANNOT FILL any orders from the following prices, aggregating less than \$10.00. Orders for 100 to 200 fish smaller sizes, go in a 50-cent can. All other orders in large cans.

*If you feed your fish Three Springs Fish Food, they will soon learn to come for it
Try our Wafer or Natural Food for Aquariums, box 10c; dozen \$1.00.*

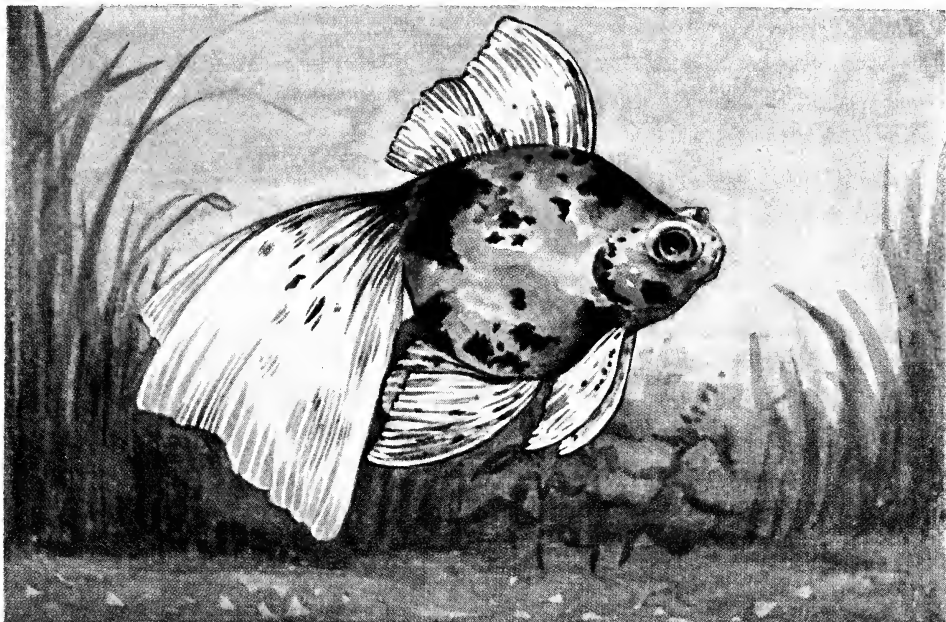

Telescopes This is a fish with large protruding eyes. Its fins and tail development is similar to the Fantail. A weird looking fish developed by the Chinese. **Price: Large size, \$5.00 per pair; dozen \$25.00; Medium size, \$3.00 per pair; dozen \$15.00.**

Nymphs These have short, plump bodies with large fin development. This fish is very similar to the Fantail except that the tail is straight, short and broad. It combines the body of the Fantail and the fin development of the Comet or Common. **Price: Large size, \$5.00 per pair; dozen \$20.00; Smaller size for tubs, \$2.00 per pair; dozen \$10.00.**

The Calico is the most beautiful, most graceful of all Goldfish. We sell out of this variety every year. It is the best of all. Order early and be assured of getting this variety

Try Our Fish Food for Ponds and Pools, 50c pound—Nothing So Good

Calico This is undoubtedly the prince of all Goldfish. Its description of color and markings are the same as the Shubunkin. Its fin and tail development that of the Fantail. It has large protruding eyes. It embodies all other choice breeds in one. **Price:** Large size, \$5.00 per pair; dozen \$25.00; Medium size, \$3.00 per pair; dozen \$15.00.

The Balanced Aquarium and its Care

THE summer is over and the question is what shall I do with my pets? Only those who have had goldfish know how fascinating they are. The answer is the Aquarium. What size shall I order? What is a balanced aquarium? etc. We shall endeavor to answer a few questions that may arise. If you have any others write us.

A BALANCED AQUARIUM

A balanced aquarium is one in which the plant life and the animal life has been made equal. It contains just enough plant life to produce enough oxygen for the animal or fish life. In addition just enough scavengers to keep the aquarium clean. An aquarium like this need no change of water, only enough added to take care of evaporation. Add just a little of our Natural Fish Food, the same kind you fed in the pool and your fish will be happy and contented. Certainly you want an Aquarium; balanced or not, you must have something for those friendly beautiful, fancy fish, that came to greet you in the pool. They will be even more tame, more lovely, more fascinating in the Aquarium.

HOW LARGE AND HOW PREPARED

The important thing is How Large an Aquarium and how shall it be prepared? First of all determine how many fish you have or wish to care for indoors, for your fish can be cared for in the pool. Above all don't crowd your fish. More fish die from being crowded and overfed than any other causes. Most people carry their very small fish in their pools over the winter and carry smaller fish in the aquarium. For those who wish to enjoy the ever-increasing pleasure of watching these pets and who wish to have fifteen or more we recommend that you choose not less than a 25 or 50 gallon aquarium preferably the larger size. A rule furnished by some is a gallon of water to each inch of fish not counting the tail.

After you have chosen the size of your aquarium, the next important thing is to get one that will not be leaking. Our aquariums, we believe, have no equal. All steel frames are electrically welded at the corners. All glass is either clear crystal or heavy plate glass. The cement is a special product and lasts indefinitely. Leakage is a rare occurrence and when it does occur can be readily and permanently stopped by use of our cement.

WHAT TO DO

First thoroughly clean your aquarium with pure salt brine. If you have running water you should see that all pipes are thoroughly cleaned. Then place in your aquarium some two inches of sand or gravel that has been thoroughly washed in a strong salt solution. You should then set your plants in the sand placing them to suit your taste. You may now add a few shells and ornaments. Be sure these shells and ornaments are thoroughly washed in salt brine. We cannot help but caution on the use of too many pebbles or shells as they afford lodging place for the excrement of the fish where scavengers cannot reach and also afford a lodging place for food where fish cannot reach it and where it decays and pollutes the water upsetting the balance of the aquarium, and causing death to the fish if allowed to remain in this condition.

PLANTS AND FISH

These are largely a matter of choice. Any good oxygenating plants such as we list will be not only helpful but ornamental. As to fish you have certainly a wide latitude of choice, from the common variety of Goldfish to the most highly developed Calicos, Shubunkins, Fantails, etc.

Watch the little fellows grow. Feed them our prepared fish food. 50c pound

STYLE No. 107

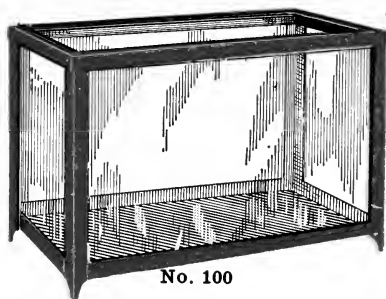

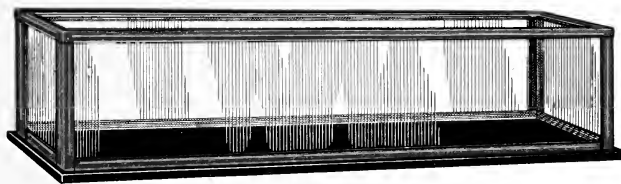

This aquarium has improved feet of great strength, perfectly leveled, standing solid on level surface. A steel frame with electrically welded corners. Sides selected crystal glass. Size 22 x 13 x 14, capacity 17 gallons. **Price, \$20.00.**

STYLE No. 104

Same as above. Size 16x9 1/2x10, cap'y 6 gals. **Price, \$6.00**

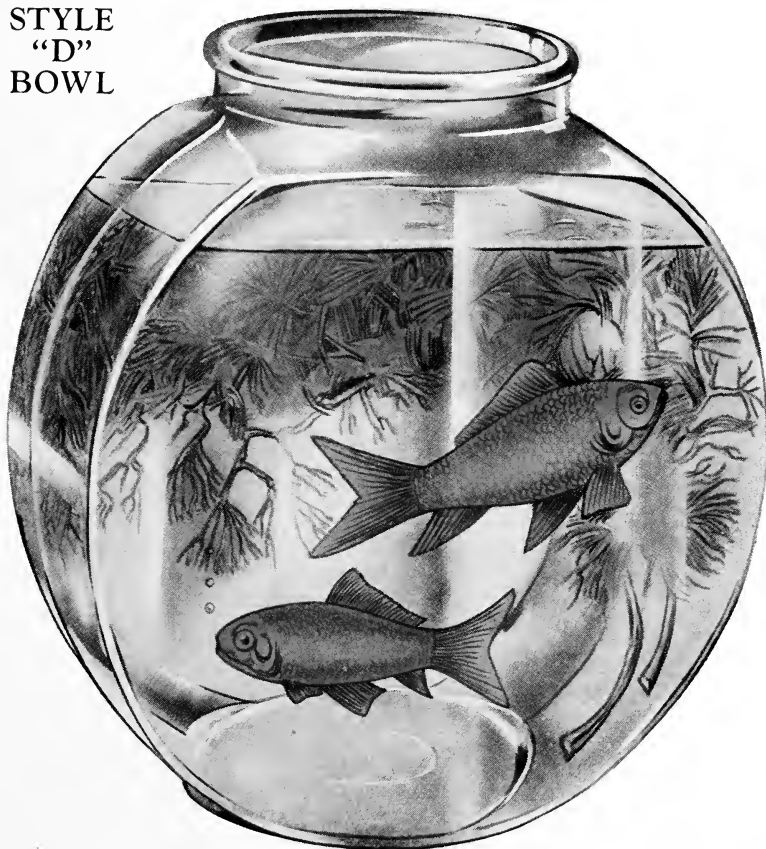

STYLE No. 101

A special for those who wish something to take place of fish bowls. Too small for brood fish. Size 10 x 6 x 7, capacity 2 gallons. **Price, \$2.00.**

**No. 100****No. 600**
**WINDOW SEAT
AQUARIUM
STYLE No. 600**

Especially built for window and made in only one size. Has heavy slate bottom extending beyond sides. This style is growing in popularity. All you have to do is to place it on your window sill.

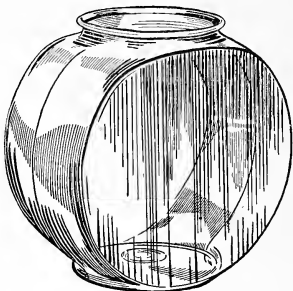

Size 30 x 8 x 10 1/2, capacity 8 gallons. **Price, \$11.00.**

POOL OF MRS. N. L. BLACKWELL, CANTON, GEORGIA

We produce both Goldfish and Waterlilies and Aquatic Plants. Buy your requirements from producers and be satisfied

Forty Miles from the Gettysburg (Pa.) Battlefield; Forty Miles from Washington, D. C.

POOL OF MRS. J. L. RADER, NORMAN, OKLAHOMA

Scavengers

Goldfish are very beautiful, so are Waterlilies and all aquatic plants. Snails, tadpoles and fresh water mussels aid in purifying the water and sand. Just as the Goldfish eat insect life and mosquitoes so do Snails consume algae and green scum; Tadpoles eat decayed matter as well as the excrement of the fish. They are of inestimable value both in pools and aquariums.

The transformation of a tadpole to a frog is not only an interesting but an instructive natural phenomena. All will enjoy seeing the legs develop and the tail absorbed and finally the real frog.

You will surely want with your fish and lilies these scavengers to help keep the water pure and clean.

TADPOLES One of the best scavengers. They do not eat fish eggs and are harmless to the fish. **Per dozen \$1.00.**

RED SNAILS Good in keeping the water clear of scum. We offer these at **50c pair; per dozen \$2.00.**

SALAMANDER Sometimes called Newts. Brown with black dots. Very fond of insect life. **50c per pair; dozen \$2.00.**

Scavenger Collection—One Dozen Each of above—\$3.50

Fish Food

You will want a cheap dependable source of supply for fish food, but above all you will want the best that can be bought at a reasonable price. Being producers of millions of fish and feeding them every day, we ought to know what to recommend. We have prepared especially for pools our regular food and offer it in bulk. It is ready to be fed, already cooked in dry form. It is recommended for pools and lakes only. **Price, 50c per pound, quart package. See page 35.**

WAFFER FISH FOOD

We have prepared a special wafer fish food. After years of experimenting we believe our Wafer Fish Food is the best that can be obtained. **Price, 10c per box of 20 wafers; \$1.00 per dozen boxes.**

Books on Goldfish and Water Gardening

You will no doubt want some good books on these subjects. We are glad to recommend the following written by the very best authorities:

“Water Gardening” By Dr. Peter Bisset who is the Senior Horticulturist in charge of the U. S. Department of Agriculture, Washington, D. C. Over 205 pages profusely illustrated with plans for pools, etc., cuts of various lilies and goldfish. A book brim full of illustrations and information. **Price, \$5.00.**

“Goldfish Varieties and Tropical Aquarium Fishes”

By Wm. T. Innes, former President of the Aquarium Society of Philadelphia. 300 pages with nearly as many illustrations. One chapter devoted to aquariums and concrete pools. A full discussion of the breeding, feeding, etc. of Tropical and Goldfish, also of the enemies and diseases, cures, etc. A complete book. **Price, \$4.00.**

“Modern Aquarium” By W. T. Innes, a 62 page booklet with photographic illustrations on the breeding habits and care of goldfish and Tropicals. **Price, \$1.00 postpaid.**

Dyed Shells and Chips

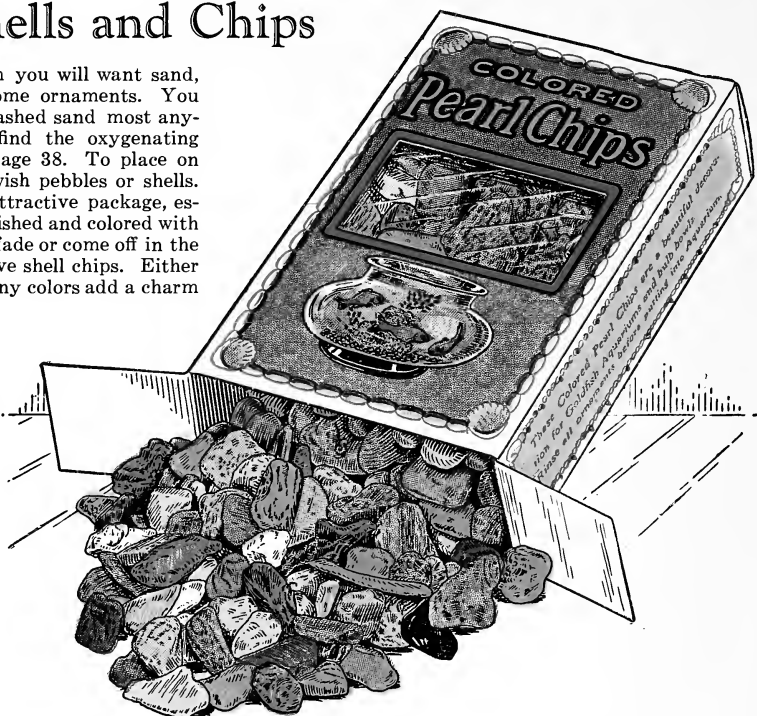

In your aquarium you will want sand, water, grass and some ornaments. You can get the river washed sand most anywhere. You will find the oxygenating plants quoted on page 38. To place on the sand you will wish pebbles or shells. We have them in attractive package, especially cleaned, polished and colored with stains that will not fade or come off in the water. We also have shell chips. Either or both by their many colors add a charm to the aquarium.

Shells, box . . . 15c

Chips, box . . . 15c

Shells, doz. \$1.60

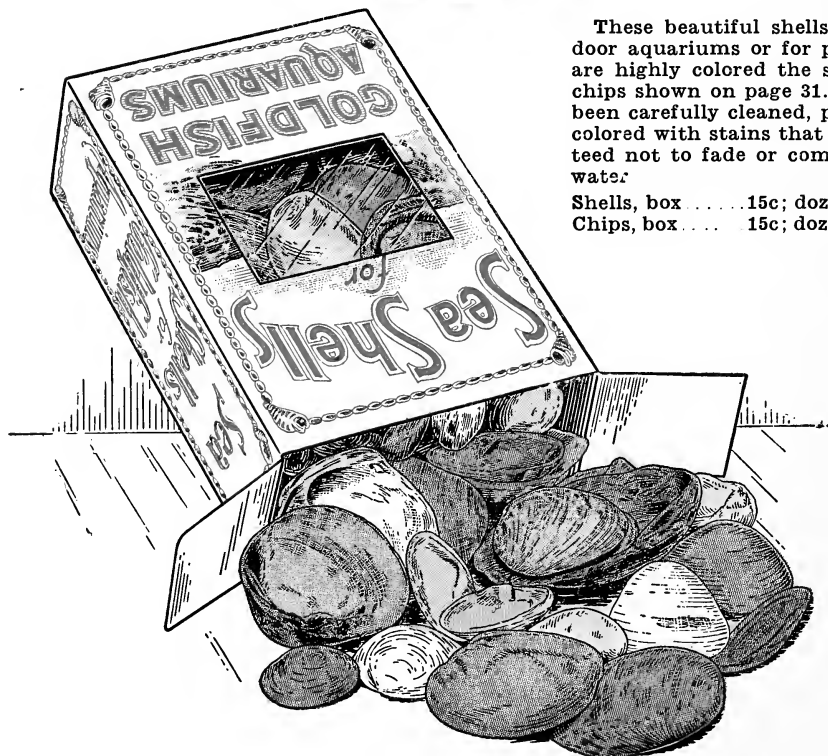

Chips, doz. \$1.50

These beautiful shells are for indoor aquariums or for pools. They are highly colored the same as our chips shown on page 31. They have been carefully cleaned, polished and colored with stains that are guaranteed not to fade or come off in the water.

Shells, box . . . 15c; doz. . . . \$1.60

Chips, box . . . 15c; doz. . . . \$1.50

Pinks are the most popular of all Colored Lilies. Try either Rose Arey or Helen Fowler

Fish Food for Aquariums

10c each
\$1.00 doz.

NATURAL FISH FOOD

10c each
\$1.00 doz.

WAFER FISH FOOD

The ideal fish food for aquarium use is either Three Springs Wafer Food, or Three Springs Natural Fish Food. The wafer food is a perfectly white pure food, about twenty wafers to the box containing just what your fish need for their sustenance. The Natural Fish Food is a dried granular food packed in a circular tin box. This food is a perfectly balanced food containing just what is needed for growth and to keep your fish in healthy condition. This is the same as our big quart size which we recommend for pools. Price for either box, prepaid is 10c each or \$1.00 per dozen boxes.

Fish Food for Pools

1 quart size
50c each

This is a granular perfectly balanced fish food. Just what your brood need for spawning and what your small fish need for rapid growth. A large size quart package for the sum of 50c. It is the cheapest and best food obtainable.

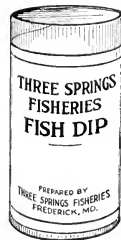

Health Dip and Fungus Remedy

Well fed and well kept fish should keep well; but fish ill kept or for one reason or another do sometimes become sick. They do for one cause or another get the fungus or tail rot or similar disease where they should have some treatment. Our Health Dip is considered one of the best remedies known for the prevention of fungus or tail rot. Our Fungus Cure is especially prepared by us after years of experience in handling millions of goldfish annually. It should give satisfactory results if used in time, as it is the best that experience has taught.

Price of either Health Dip or Fungus Cure for one ounce package is 25c each, or \$2.50 per dozen boxes.

25c each

25c each

*Nothing more beautiful, productive too, than Selected Goldfish. They multiply rapidly in pool

POOL OF W. A. SCHMITT, MEREDOSIA, ILLINOIS

Water Iris

We are making a separate heading for this most beautiful of water garden flowers. It should be in every garden. None is complete without it. They are extremely easy to grow either in shallow water or in boxes above the surface or along the edge. They flower freely, having large blossoms borne on many flowered spikes. With different varieties you can have flowers over a long period. Shipping season for Iris from June 15 to September 1st.

IRIS PSEUDACORUS (yellow). Bright yellow.....	25c each; \$2.50 dozen
IRIS VERSICOLOR (blue).....	25c each; \$2.50 dozen
IRIS ORIENTALIS (lavender and blue) early.....	25c each; \$2.50 dozen
IRIS PUMILA (purple). A dwarf.....	25c each; \$2.50 dozen

Hardy Perennials

We are listing Hardy Perennials especially adapted to wet and very moist, but well drained soils. There are many that will grow equally as well in moist as dry soils and you will wish both. Most perennials are taken from pots when shipped so that they will arrive in best condition with no broken roots.

ASTER (Rock) A dwarf 6 to 10 inches high with large showy bluish purple flowers. Fine for rockery or edging. Early bloomer. 30c each; 4 for \$1.00.

ASTER (White) Same as above except that the flowers are pure white, early spring bloomer. 30c each; 4 for \$1.00

ASTER (Italian) From 12 to 15 inches, free bloomer; bluish purple flowers with yellow center blooms. September and October. 30c each; 4 for \$1.00.

ASTER (New England) White same as above except flowers are white. 30c each; 4 for \$1.00.

ASTER (New England Rose) Same as former except flowers are bright rose colored. 30c each; 4 for \$1.00.

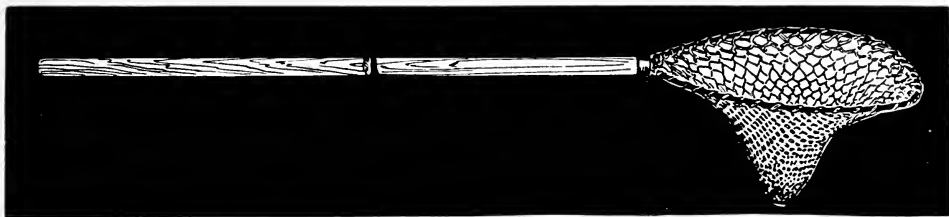

ASTILBE (Spirea) The plant bears many flowered panicles, and in wet soil will attain a height of 4 feet. Blooms July and August. Can furnish in pink, white, lilac and red. 3 for \$1.00; \$2.50 dozen.

GENTIAN A strong and vigorous grower. Flowers a deep blue. Blooms in July and August. 3 for \$1.00; \$2.50 per dozen.

HELENIUM (Sneezewort) This plant is at home in a moist soil. A very showy bright yellow flower, which blooms from July to October. 3 for \$1.00; \$2.50 per dozen.

LOBELIA (Cardinal Flower) Grows from two to four feet high. Flowers are cardinal red, borne on a long spike. Blooms from July to September. One of the finest of our native plants. 3 for \$1.00; \$2.50 per dozen.

Don't be the last to place real up-to-date fancy goldfish in your pool, and be sure you are getting real money value. We produce our own fish and suggest you buy the best. Tell us what you want. Tell us your conditions, your surroundings. We will recommend and furnish goldfish that will be admired by all your friends. Have a real pool this year.

Dip Nets

Goldfish should never be handled by hand. Dealers should have the large or 6-inch net while the home should have the small 3-inch or the large 6-inch size. These nets are especially desirable when changing water in either globes or aquariums. **Price, 3 inch 15c each prepaid; 6 inch 30c each prepaid; 3 inch, \$1.25 per dozen; 6 inch, \$2.50 per dozen.**

A Few Testimonials

THREE SPRINGS FISHERIES,
Frederick, Maryland.

RED BANK, N. J., September 15, 1930

Gentlemen:—

Some time ago you wrote asking about my pool. I am sorry to have delayed so long answering, but hope my pictures will show you the lovely result. I have made of a dream which I doubted would ever come true. When the pictures were taken I was so unfortunate as not to have any lilies in bloom, but they have bloomed beautifully. Of course I have made some mistakes, which I expect to rectify next year. The fish have proved prolific breeders, having spawned twice since May. Even the snails felt the urge to become the elders of large families. I had hoped to have little fish, but I certainly was surprised to see the tiny snails clinging to the side of the pool.

Of course my planting is not complete nor have I found enough rocks to encircle it yet, but incomplete as it is, it has been a wonderful fulfillment of a desire for a pool inculcated within me since I first became a subscriber to Better Homes and Gardens nearly five years ago.

Next year, I shall try to get a picture when the lilies are in bloom to send you.

Thanking you most sincerely for the pleasure you have afforded me, I am,

Yours truly, MRS. EDITH R. SMITH.

THREE SPRINGS FISHERIES,
Frederick, Maryland.

WASHINGTON, D. C., August 18, 1930

Dear Sirs:—

Several months ago we purchased a number of goldfish and some fish food from you. The fish seem to thrive especially well on this food, and I should like to have some more. I am enclosing a check for \$1.65, allowing 15c for postage, and will you please send me three pounds of the fish food.

Yours truly,
MRS. J. W. MILBURN.

MR. C. C. C. THOMAS,
THREE SPRINGS FISHERIES,
Frederick, Maryland.

MANASSAS, VA., July 26, 1930

My dear Mr. Thomas:—

Some time last spring I called at your plant at Three Springs and accepted a collection of lily bulbs suitable for a 12-foot circular pool. To say I am highly gratified with results would be putting it mildly. I am especially pleased with the fragrance of some of these lilies. I can unqualifiedly recommend the Three Springs Fisheries as honest, reliable, and trustworthy. The novice who begins the culture of water lilies will soon become a devotee.

Very sincerely,
O. O. HOLLER.

Aquatic Plants

With your water lilies you will need other plants. Surely the Lotus and then other aquatics. We have the floating; the oxygenating or under-the-water plants; the shallow water plants; the marsh plants; the ferns and the perennial plants; for margins or borders. We do not attempt to list them all and thereby confuse you but we do list the best of each.

FLOATING PLANTS

WATER HYACINTH A very showy, interesting floating plant. Glossy green leaves. Flowers are borne on a stem about one foot high. Six to eight flowers in a spike. Flowers are pale blue. Killed by frost and should be treated as an annual. **Price, 50c for 3; \$1.50 per dozen.**

WATER POPPY A very small plant producing large yellow poppy flowers. Its roots should be planted in the soil. **Fifty cents for three; \$1.50 per dozen.**

WATER LETTUCE A very ornamental aquatic plant. Floats on the surface and is four to six inches across. It likes the shade. It has blue green fluted leaves. Killed by frost. **50c for 2.**

OXYGENATING PLANTS

ANACHARIS A rapid grower. Desirable for pools, tubs and aquariums. **Price, \$1.50 per dozen bunches.**

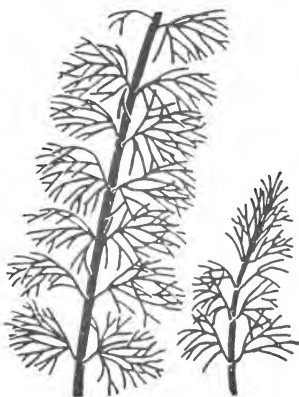

CABOMBA A splendid oxygenating plant; a rapid grower, roots easily and splendid for fish to spawn on. **Price, \$1.50 per dozen bunches.**

MYRIOPHYLLUM We sell only the red-stemmed. This is probably the best of all for goldfish spawning. **Price, \$1.50 per dozen bunches.**

POTOMOGETON A plant which grows to the top of the water but never above it. **Price, \$1.50 per dozen bunches.**

WATER HYACINTHS

CABOMBA

SHALLOW WATER PLANTS

ARROW-HEAD (Giant) We have seen many of these, but we have yet to see any so large, and thrifty as grow in our gardens. A hardy plant from 1 to 3 feet producing large spikes of white flowers. **50c each; 3 for \$1.00; \$2.50 per dozen.**

COMMON CATTAIL A favorite native swamp plant. Easy to grow and ornamental. Hardy. **3 for 50c; \$1.50 per dozen.**

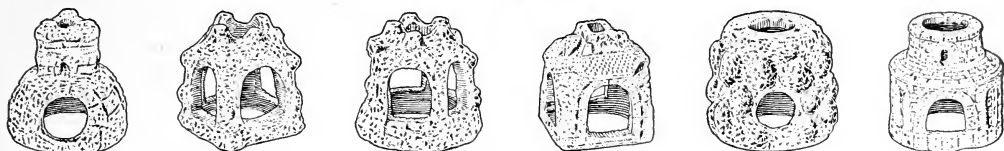

PARROT FEATHER A rapid grower with feathery green stems. Hardy. **3 for 50c; \$1.50 per dozen.**

WATER PLANTAIN A plant along the edge in shallow water with heart shaped leaves. Has tall branching spikes of white flowers. Hardy. **3 for \$1.00; \$2.50 per dozen.**

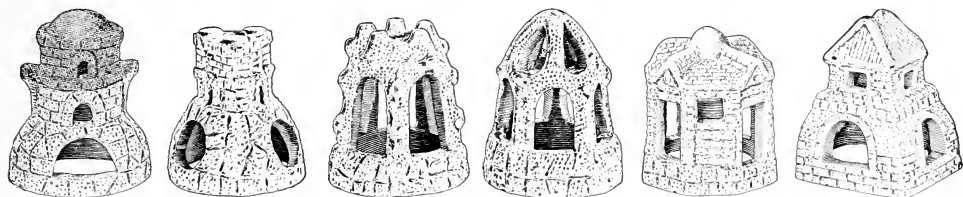

CALAMUS Grows to a height of 2 to 3 feet and has lance-shaped leaves. Its root is much admired for its flavor as well as its medicinal qualities. Hardy. **3 for \$1.00; \$2.50 per dozen.**

*If you wish a beautiful, low priced Pink Lily, try the Helen Fowler

For Table Decoration, we offer in one package, ready for shipment, a large two-gallon crystal, type "S" (see page 27) bowl, an ornament and a stand all complete for **\$1.25 each.**

*Nothing more beautiful, productive too, than Selected Goldfish. They multiply rapidly in pool
Remember We Grow Our Goldfish and Ship Direct from Our Hatcheries*

To our Friends:

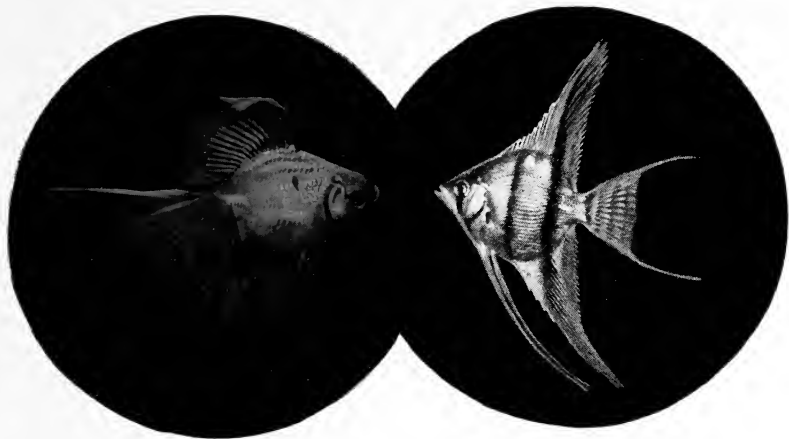

We desire, in closing, to express our appreciation of the many kind and favorable comments received from Landscape Architects, Estate owners, Gardners and private individuals from every state in the union as well as from foreign countries. Space does not permit us to use but a few of the many testimonials we have received during the past year.

We have been highly pleased with the amount of business we have received from the public and especially pleased to note the large number of repeat orders.

We ask that you bear in mind that in placing your order with us you are assured of material of the highest quality, shipped direct from the largest producers (not distributors) of goldfish and waterlilies in the world. Our reputation is founded upon both the quality of our products, and the service which we render. It is our highest aim to satisfy our customers and hence our unqualified guarantee, "You must be satisfied."

Our earnest hope is that the coming spring may bring you great pleasure and happiness and that we may help contribute to it by giving to you such advice and service as will enable those who have not yet had a water garden, to have one, and to those who have gardens, to make them more beautiful and attractive.

THREE SPRINGS FISHERIES,
Frederick, Maryland.

THE MODERN AQUARIUM

by WILLIAM T. INNES

Published by Innes & Sons, Philadelphia

A FINE BOOK FOR A DOLLAR

Packed with practical information. Clearly answers the questions which aquarium owners are constantly asking:

- "How often must I change the water?"
- "How much and what should I feed my fish?"
- "Why does the water turn cloudy?"
- "What makes my fish die?"
- "How long does a goldfish live?"
- "How many fishes can I have in an aquarium?"
- "Is there anything I can do for a sick fish?"
- "Do I need plants in my aquarium?"
- "What can you tell me about the new kinds of aquarium fishes that I hear so much about?"

These and all other every-day questions are answered in a plain, practical and interesting way.

By following our easy directions the reader will have very few fish losses, the aquarium will be kept sweet and clean *without changing the water*. It will be a constant source of interest, as well as a thing of beauty, in the home, the office, or the public place.

This book amounts to an abbreviated edition of the standard work by the same author, "Goldfish Varieties and Tropical Aquarium Fishes," selling at \$4.00. It is published in answer to the demand for a more condensed and more popular-priced book.

The chapters cover:

Aquarium Principles
Aquarium Management
Goldfish Varieties
Tropical Fishes
Diseases and Treatment

There are thirty-nine beautiful illustrations, mostly from life photographs by the author. These show the leading varieties of the Goldfish, an assortment of the more popular Tropicals, the best Aquarium Plants, Breeding Equipment, etc.

A wonderful little book for the price, \$1.00
It will pay for itself over and over again.
